AMP™ Motorization

Why AMP™?

The slim design of the quiet, yet powerful motor and the position on the track allow it to sit seamlessly behind your drapery panel so you'll never have to sacrifice your style or measures, you're able to move the draperies with a gentle tug, allowing for operation without the remote present or if a guest is unaware of the motorization feature. The dual battery backup allows operation in case of a power outage so draperies may be opened in the event of a power outage. AMP™ Motorization is available on our most popular traversing tracks, Estate and Architectural Series 94001 and in drapery header styles Ripplefold™ and pleated for a variety of styling options. This is comfortable living at its finest.

For AMP™ Motorization brochure, programming instructions and installation instructions, please visit the drapery hardware resource library at kirsch.com.

Benefits & Features

AMP™ Motorization

- Motor mounts to the back of the track which allows a seamless look between motorized and manual traverse rods
- Drapery fabrication does not need to change between manually controlled draperies and motorized draperies; No additional returns or any special instructions
- Limits are set automatically after installation
- Remote control is radio frequency and easily pairs with the motor
- Tug feature; when drapery is pulled the motor will traverse the drapery
- AMP™ App with AMP™ USB Bridge
- Architectrac® Series 94001 Rods with AMP™ cannot be bent or curved

Frequently Asked Questions

What is the weight capacity?

64 lbs Motor is rated to 64 lbs. Be sure not to exceed Architectrac track specifications to ensure it operates optimally.

Can you double the weight capacity by using two motors?

No Only use one motor per rod.

Does AMP™ offer limit setting?

Yes The motor automatically sets its limits.

Does AMP™ offer touch control?

Yes The tug feature allows you to pull on the drapery and it will automatically open or close your drapery.

How long is the power cord?

6 ft The durable, non-extendable power cord can reach places. Any extra can be rolled up. Cable extensions are available in 15', 30' and 60' outlets that are farther away from the motor.

Is there a wall switch?

Yes There are Flush Mount and Surface Mount switches.

Does AMP™ offer a warranty?

Yes See the Kirsch Warranty document for details.

Bracket Spacing & Mount Options

Place brackets at each end. On the ends where the drapery will stack, place the next bracket 24" from the first bracket, then place remaining brackets at 48" intervals over the rest of the track. Spacing may need to be shortened for heavier draperies. All mounting options are available with our AMP™ Motorization.

1 3/8" Estate™ with AMP™ Motorization

Small but Mighty

The 1 3/8 inch Estate™ rods are our newest decorative traversing drapery rods. Available in our Designer Metals™, Wood Trends™ and Wrought Iron collections, this new smaller size is perfect for smaller spaces while still providing high performing function. The rod may be smaller, but the style is still bold. You can pair any of the 1 3/8 inch finials to complete your design so you never have to sacrifice your brilliant style for performance.
