AMP™ Motorization

Why AMP™?

The slim design of the quiet, yet powerful motor and the position on the track allow it to sit seamlessly behind your drapery panel so you'll never have to sacrifice your style or measures, you're able to move the draperies with a gentle tug, allowing for operation without the remote not present or if a guest is unaware of the motorization feature. The dual battery backup allows operation in case of a power outage so draperies may be opened in the event of a power outage. AMP™ Motorization is available on our most popular traversing tracks, Estate and Architectural Series 94001 and in drapery header styles Ripplefold™ and pleated for a variety of styling options. This is comfortable living at its finest.

For AMP™ Motorization brochure, programming instructions and installation instructions, please visit the drapery hardware resource library at kirsch.com.

Benefits & Features

AMP™ Motorization

- Motor mounts to the back of the track which allows a seamless look between motorized and manual traverse rods
- Drapery fabrication does not need to change between manually controlled draperies and motorized draperies; No additional returns or any special instructions
- Limits are set automatically after installation
- Remote control is radio frequency and easily pairs with the motor
- Tug feature; when drapery is pulled the motor will traverse the drapery
- AMP™ App with AMP™ USB Bridge
- Architectural® Series 94001 Rods with AMP™ cannot be bent or curved

Frequently Asked Questions

What is the weight capacity?

64 lbs Motor is rated to 64 lbs. Be sure not to exceed Architectural track specifications to ensure it operates optimally.

Can you double the weight capacity by using two motors?

No Only use one motor per rod.

Does AMP™ offer limit setting?

Yes The motor automatically sets its limits.

Does AMP™ offer touch control?

Yes The tug feature allows you to pull on the drapery and it will automatically open or close your drapery.

How long is the power cord?

6 ft The durable, non-extendable power cord can reach places. Any extra can be rolled up. Cable extensions are available in 15', 30' and 60' for outlets that are farther away from the motor.

Is there a wall switch?

Yes There are Flush Mount and Surface Mount switches.

Does AMP™ offer a warranty?

Yes See the Kirsch Warranty document for details.

Track Length	Number of Splices
8 ft. to 16 ft.	1

Operating Systems

Motorized Draw

AMP™ Motorization

- Easy to use
- Quiet, powerful motor
- Pleated or Ripplefold™
- For Estate™ Traverse Rods or Architrac® Series 94001
- For more information, see page 46

Manual Draw

Cord Draw

- Easy to use
- Pleated or Ripplefold™

Hand/Baton Draw

- Easy to use
- A gentle tug allows drapery to glide across track
- Pleated or Ripplefold™

Baton Duplex Draw

- Easy to use
- Used on split draw rods
- Pleated or Ripplefold™
- When the baton is pulled on one stack, draperies on both sides

Header Styles

Ripplefold™

- Panels can be pressed flat, yet fall into fold
- No hooks or pins
- Headings are suspended under track
- Stack back is less than conventional pleated draperies
- Draperies snap on/off carriers for easy installation
- Interior drapery appearance is identical to exterior-facing appearance

Pleated

- A classic header option
- Can be used with most track systems using slip-in or pin-on hooks

Bracket Spacing & Mount Options

Place brackets at each end. On the ends where the drapery will stack, place the next bracket 24" from the first bracket, then place remaining brackets at 48" intervals over the rest of the track. Spacing may need to be shortened for heavier draperies. All mounting options are available with our AMP™ Motorization.

Calculating Drapery Weight

1. Fabric Weight

Some fabric samples list on the back of the swatch the weight listed in Ounces/SqYd. Call the manufacturer for the weight if not listed.

2. Lining Weight

Most drapery linings are 2oz - 4oz per square yard.

Drapery Weight Formula

Total Square Yards = (total yards x 36 x fabric width) ÷ 1296 (1-square yard)
Weight = total square yards x weight in ounces per SqYd ÷ 16 oz in lb

Example 32 yards of 54" wide fabric weighing 14 oz/SqYd
Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYd
Weight = (48 x 14oz) = 672 ÷ 16 = 42 lbs

Lining Weight Formula

Total Square Yards = (total yards x 36 x fabric width) ÷ 1296 (1-square yard)
Weight = total square yards x weight in ounces per SqYd ÷ 16 oz in lb

Example 32 yards of 54" wide fabric weighing 6 oz/SqYd
Total square yards = (32 x 36 x 54) = 62,208 ÷ 1296 = 48 SqYd
Weight = (48 x 4oz) = 192 ÷ 16 = 12 lbs

Fabrics by Weight

Contact the fabric manufacturer for your specific fabric weight.

Fabric Type	Weight per Square Yard
Drapery Lining	2-4oz
Interlining	5-6oz
Blackout Lining	6-10oz
Bump Lining	12-14oz
Silks	2-4oz
Chintz	2-4oz
Printed Cottons	4-6oz
Linens	6-10oz
Jacquards	10-14oz

Pole Installation, Cutting & Splicing

Top Hole Installation Guide

This chart will position the bracket so the drapery will clear the floor approximately ½".

- 1. Find your pole style, size and header style in the chart.
- 2. Determine the desired finished drapery length.
- 3. Add or subtract number in the top hole column from the drapery's finished length to determine how high to measure for the top hole of the bracket.

Cutting & Splicing Designer Metals™ Poles

- Measure to desired length and carefully wrap area with an easy peel, blue painter's tape as not to damage the finish.
- Cut through the tape with sharp fine tooth saw. Cut slowly to reduce any chipping to the product finish.
- For spliced poles, add a finial plug to the end cut.

Finial Plug
1 3/8" Diameter
Part # 7
