Tolerance:

Finished blind width (net) may vary $\pm 1/16$ "

Finished blind height (net) may vary between -1/8", and +1/8"

Control

- Control System: Wand Tilt
- Location: Headrail is reversible upon installation

Wand – Standard Drop Sizes

- The standard wand drop is measured from the top of the headrail to the bottom of the wand grip.
- There are 3 wand sizes available as the default:
 - 34", 49" & 61"

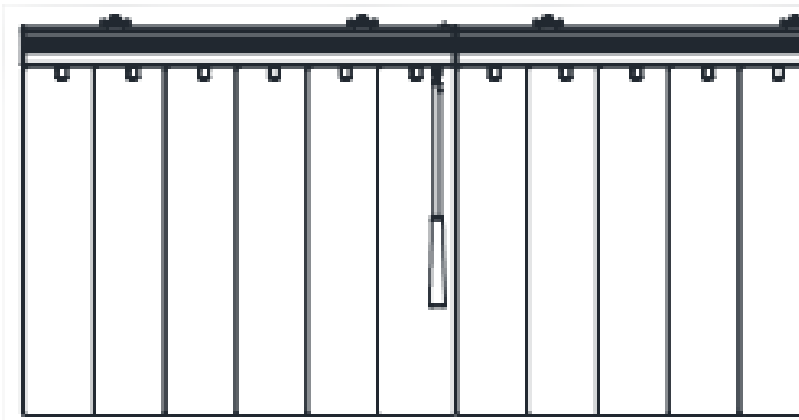

Blind Height (Y)	Wand Drop Size
$Y \leq 84"$	34"
$84" < Y \leq 96"$	49"
$Y > 96"$	61"

General Specifications

Side by Side

When butting two blinds together to reach the desired width, both blinds must be installed with the same wand orientation. Both blinds must be installed with the same wand orientation. Do not butt a stacked left and stacked right together. If you do, the meeting vanes will interfere with each other during operation.

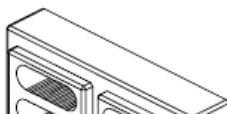

This is not an option in an order entry. Please order the same orientation to cover larger windows.

(609) 742-1720

Shims (Optional)

- Ideal for projecting the blind further out to provide clearance when mounted above a trim or molding.
- If shims are required, we recommend ordering the bracket as a minimum.
- Provides 3/8" extension from wall, or stack 2 shims for a total extension from wall.

General Specifications

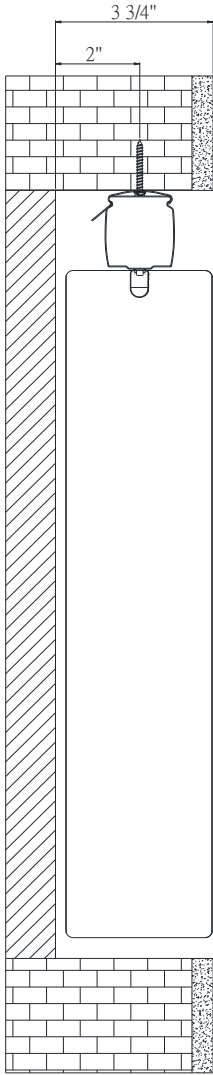

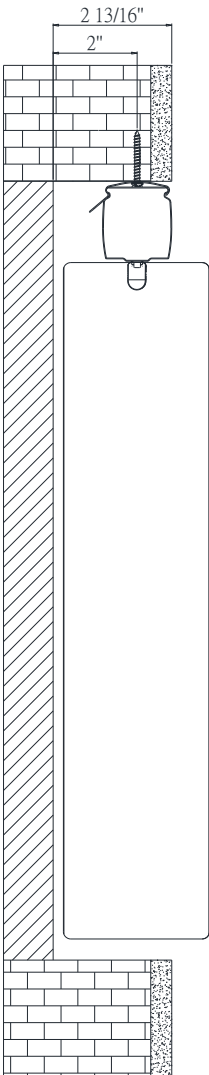

Even Vane Spacing

For even spacing between slats, it is recommended to use the following widths. Other custom order widths are available but the blind is closed. This table applies to OB blinds only.

Additional Color Information

Hardware Color Coordination Override

The headrail, wand and other components will be Pure White, Silk White, Nature or Silver Moon can also be used to override the default color coordination.

Color on Back

Some vanes are made with a neutral, white backing while others are produced with the same color on the back.

Classic, S-Curved, Sandblasted collections, and the **Pure White** color in all collections are the same color front and back.

Product Care

Maintaining Synchrony™ Vertical

Routine cleaning will help maintain the beauty of your Synchrony™ Vertical Blinds.

Proper ways to clean Vertical Blinds:

- Maintenance: Use a cloth or duster to remove dust from the vanes.
- Deep Clean: Use a damp cloth to wipe each vane. Start at the top and move the cloth around vane starting from the top and moving to the bottom.
