ABOUT THE COLLECTION

The Walden Premier Collection includes contemporary patterns, with bamboos that have been reimagined for modern decor, woven jutes in trending neutrals and white color choices, and soft, natural fabrics.

Using natural shades in your design is a subtle way to bring the timeless beauty of nature into your space.

Shades incorporate natural fibers like bamboo, jute, and ramie into their weaves, which are selected based on color and luster. Materials are hand processed and woven into shade fabric. Finished fabrics highlight the textures, colors,

All the patterns in shades. Made for draperies.

Natural shades in several colors to tailor your design and shade.

The collection includes a variety of fabrics, including the heaviest.

Like any natural product, fabrics may show natural color changes over tim

Woven wood fabrics are not ideal for rooms with excessive humidity like ba
environments may bow or twist over time.

SHADE STYLES

Shades come in two basic shade styles: standard and waterfall.

STANDARD SHADES

Has a 6" valance on the front of the shade.

Valances are lined with Room-Darkening liner material to conceal
the head rail components. Unlined shades will have lined valances
coordinated to the shade material. Light-filtering lined shades will have
lined valances coordinated to the liner material.

WATERFALL SHADES

Has no front valance. The shade comes off the front of the head rail in
a flat panel.

Available with back valances, which can be ordered in either the
shade fabric or the liner fabric for lined shades. Back valances
conceal the shade components from the back of the shade.

Available with interior valances. Interior valances come standard
with waterfall shades that are unlined or that are ordered with a
light-filtering liner. Interior valances block the outline of the shade
components from showing on the front of the shade. Valances are
4" long and are made with coordinated liner material. *Because the
valance is made with Room-Darkening fabric, the part of the shade in
front of the interior valance will look darker than the rest of the shade
when light is coming through.*

BOTTOM BARS

Clutch and motorized shades will be made with a flat sewn-in bottom
bar. If hold down brackets are requested, a round bottom bar will be

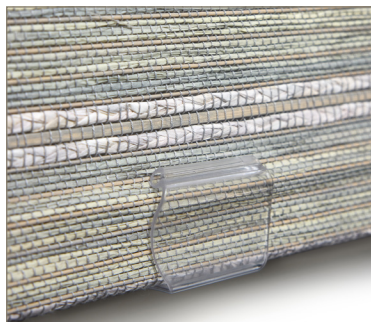

Call for current pricing
(609) 742-1720

CORDLESS SHADES

Cordless shades are raised by pushing up on the hem bar and lowered by pulling down on the hem bar. A spring control system located under the wooden head rail holds the shade in place at the desired position.

Clear grips are added to the hem bar of cordless shades, one per shade up to 72" wide and two for wider shades.

Cordless shades are available up to 96" wide and 96" long and will be mounted on a 1½" deep head rail (see Specifications for details).

Clear Grip

Call for current pricing
(609) 742-1720

TOP-DOWN BOTTOM-UP

Raised from the bottom or lowered from the top.

To conceal shade components, shades will be finished with a Room Darkening lined front valance and a back valance. Back valance will be shade material for unlined shades or liner material for lined shades.

TDBU shades are not available in waterfall style, as 3-on-1 head rail twin shades. Only available with cordless control.

Note: Inside Mount TDBU shades are not available to be ordered with returns. For installations where returns are required for inside mount follow the recommendation below:

Order shades as outside mount with returns. Shades should be 1" narrower than the required width. This will leave a 1/2" gap on each side for the shade fabric, and the valance will be 1/4" wider on each side to create a clean corner with the returns. This will cause slight

CLUTCH CONTROLS

Clutches provide an assisted lift for large or heavy shades and come standard with metal chain loops. Metal chain loops can be made in custom lengths.

Compliant cord tensioners are provided with clutch control shades. Cord tensioners secure the cord loop to the wall or window. They must be installed so the shade is compliant with safety regulations and operates correctly.

Standard shades ordered with a clutch come “clutch adjacent” to keep the stack of the raised shade from interfering with the loop. This means the shade fabric will be narrower than the ordered width on the control side, allowing the cord to hang to the side of the shade (see diagram). This may cause a light gap on black-out shades.

Waterfall shades ordered with clutch controls will have control loops behind the shade and are not available to be ordered as clutch adjacent.

Call for current pricing
(609) 742-1720

PRO WAND SHADES

Pro Wand shades are powered by a rechargeable battery motor and are operated by pressing the buttons on the wand handle, which hangs to the side of the shade.

Pro Wand is a good alternative to cordless when the window or shade size makes it hard to raise or lower the shade.

USB-C charging port for the motor battery is located on bottom of the Pro Wand handle.

Wand is only available in White.

4 available wand lengths: 24", 36", 48", and 60".

Motorized shades are mounted on a deeper head rail (see Specifications for details).

Shade fabric will be made narrower than the ordered width on the control side, allowing the wand to hang on the side of the shade. This may cause a light gap on Room-Darkening shades.

Not available to be ordered with waterfall shade styles or for shades with a movable liner.

^[1]Requires installation by an electrician.

^[2]Battery tubes are included with shades free of charge. Battery Tube has a 5¼" attached (rechargeable), Energizer® Ultimate Lithium™ L91 Batteries, or Lithium batteries (rechargeable).

^[3]Battery Pack has a 5¼" lead wire. Requires recharging. Ships separately from shades.

^[4]Plug-in Power Adapter has a 60" lead wire. Powers motor directly through a standard wall outlet.

^[5]When paired with the Plug-In Power Adapter, the total cable length should not exceed 60".

External LI Battery Pack

Plug-In Power Adapter

EDGE BINDING

Edge bindings are available as a no charge option.

Edge bindings will be sewn down both sides of the shade and valance and are not applied to the bottom of either.

All edge bindings will be approximately 1/2" wide on the face of the shade.

Some patterns are required to be ordered with edge binding, as noted in the Materials Reference table. Patterns that require edge binding have the warranty for frayed edges voided if ordered without it.

Call for current pricing
(609) 742-1720

ATTACHED LINERS

Attached liners are secured on the back of the shade. Shades will have a lined valance and a lined shade fabric.

If a shade is lined, the valance will automatically be lined with the same fabric. If a shade is lined, the valance will be made with a lined valance to conceal the lift mechanisms.

Many patterns let a lot of light through and offer little privacy at night. Attached liners when light control or privacy is desired.

No Liner

Light-Filtering Liner

Call for current pricing
(609) 742-1720

TWIN SHADES

Twin shades are shades with a separate, operable liner and two sets of controls. One set of controls is for the front shade and one for the liner shade behind. Controls are recommended to be positioned behind the front shade.

Controls can also be a mix of cordless, clutch, and remote motorized. Controls can always be positioned behind the front shade.

Outside mount twin shades will be made with a valance that is 1/2" wider than the shade. This will allow the returns to fit behind the valance.

Twin shades have deeper head rails to accommodate the dual sets of controls.

Twin Shades are not available as TDBU, 3-on-1 head rail, or with Pro

MULTIPLE SHADES ON ONE HEAD RAIL

Shades are available with 2-on-1 or 3-on-1 head rail. The maximum shades will be no more than 1/2". The maximum width for a common made in sections to match the individual shade widths.

Clutches, cordless controls, and motorization (wand and remote) ca dered with clutch control, pay careful attention to make sure there a when specifying multiple shades on one head rail, particularly for th

Available for standard shades and TDBU shades. Not available for :

HOLD DOWN BRACKETS AND SPACER BLOCK

Hold down brackets are supplied upon request for all control types.

Spacer blocks measuring 3/8" are available upon request with a max of 2 spacer blocks per bracket recommended. **Note:** if using space blocks with extended returns, extended returns do not account for t additional space created by the spacer blocks.

SPECIFICATION

INSIDE MOUNT SHADES

Inside mount shades have a $\frac{3}{8}$ " overall shade deduction.

When ordered with returns, the valance and shade fabric will be made to the inside mount deduction. The head rail will be an additional $\frac{1}{2}$ " narrower to create a clean corner in the front of the shade.

Inside mount shades are made with standard depth returns, which are designed to fit inside the window frame.

INSIDE MOUNT STANDARD SHADES

SLIDING PANE

SLIDING PANELS

Sliding Panels are fabricated using the Absolute Panel system by C

Sliding panels provide a clean, contemporary look for large window suspended from hangers, which glide smoothly on an aluminum tra allowing panels to stack away from the window.

Panels can be pulled open and closed with a clear acrylic wand. Pa ordered width and the number of panels.

OPENING OPTIONS

ONE-WAY

When open, panels stack to either the right or left. *Specify on the or will stack.*

The standard configuration is for the back panel to be stationary and Reverse stacking is available, with the front panel stationary. Free-fl

CENTER OPENING (SPLIT DRAW)

Must be made with an even number of panels. Panels stack to both

Standard configuration is the back panel on both sides to be station 4 panel center opening can also be requested on a 2 channel track depth. See Sliding Panel Configurations on page 28.

Reverse stacking and free-floating panels are also available.

Note: If you want the panels to stack completely away from the winc panel width in the overall width of the shade. See Specifications for

Call for current pricing
(609) 742-1720

SLIDING PANEL INSTALLATION A

TRACK INSTALLATION

Tracks are installed using either a top mount or face mount bracket. Both bracket options have a flange which is inserted under the lip of the track and a tab which the track snaps into to hold the sliding panel track in place.

Tracks and brackets are available in white or silver.

PANEL INSTALLATION

Panels are suspended by a Velcro top rail, which slots into the track runners. See Panel Installation on page 27 for illustration.

Velcro top rail and Runner

Call for current pricing

(609) 742-1720

BOTTOM BAR

Sliding panels will be finished with a flat, fabric wrapped bottom bar

SLIDING PANEL BOX

VALANCE BOARD

Sliding panels can be ordered with a valance board, which installs above the sliding panel track. 8" valances attach to the board.

Valances can be installed either direct mount if top mounting or use an L-bracket when face mounting. Sliding panel tracks will be installed to the underside of the valance board.

Valance boards will be matched to the color of the fabric used for the sliding panel.

When ordered inside mount, valances will attach to the front of the valance board only with no returns. When ordered outside mount, valances will include enough fabric to cover the front and sides of the valance to create a clean corner.

Valances will have fabric railroaded.

The height of the sliding panel is measured from the top of the valance board to the bottom of the sliding panel. The valance board is 3/4" thick and the factory will account for all required deductions.

The depth of the valance board is based on the number of tracks the sliding panel will have. See chart below.

180"	5 panels	38"	8 panels	24 5/8"
192"	5 panels	40 3/8"	8 panels	26 1/8"

PANEL SIZE CALCULATIONS

Sliding panels are ordered slightly wider than required to include a 2 1/2" panel overlap allowing for privacy. Reference the table above for panel widths of select track sizes based on the configuration.

To calculate an approximate panel width, multiply the gaps between your panels (the number of panels ordered minus 1) by 2 1/2" (the panel overlap). Add this number to the overall width of your panel track. Then divide that number by the number of panels ordered.

For example: For a 96" one-way panel track, each panel will be approximately 25 7/8" wide.

4 (panels) - 1 = 3 gaps

$3 \times 2 \frac{1}{2}" = 7 \frac{1}{2}"$

$96" \text{ (ordered width)} + 7 \frac{1}{2}" = 103 \frac{1}{2}"$

STANDARD TRACK

Width

NATURAL DRAPE

NATURAL DRAPERIES

Natural Draperies present a sophisticated and stylish way to cover a window. When specifying, note that the Natural Drapery will include decorative track with a rectangular profile. Because draperies install using a decorative track, no additional product is needed.

Natural material is railroaded to hang vertically when ordered in this style. The material is sewn to all four sides to protect the edges and is included in the price.

Natural draperies are constructed using wave tape. Hooks attach to the track, allowing the drapery to traverse the track while maintaining their structure when being opened or closed.

Check the Materials Reference table for patterns that are available to you.

OPENING OPTIONS

ONE-WAY

Drapery is one continuous panel that stacks to either the right or left of the window. The drapery will stack to the right or left of the window.

CENTER OPENING (SPLIT DRAW)

Drapery is two panels, which open in the middle and stack to either the left or right of the window.

Note: If you want the panels to stack completely away from the window, specify the panel stack width in the overall width of the shade. See Specifications for more information.

Call for current pricing
(609) 742-1720

NATURAL DRAPE

INSTALLATION TRACKS

Draperies install with our contemporary decorative track, which has with the panels. Natural Draperies must be installed with the supply price of the drapery.

Tracks are offered in 6 colors: Anthracite, Black, Bronze, Champagne

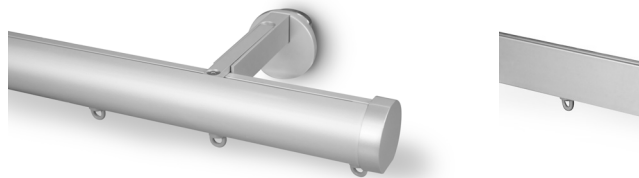

Tracks are offered in rectangular or round 1³/₈" profiles and will include brackets. Carriers and hooks will be coordinated to the track color. pairings.

Track installation brackets are available for wall or ceiling mount. With

Aluminum batons are color coordinated to drapery hardware and are provided for split draw draperies.

Tracks over 94" in width will be supplied with a splice. See photo of

SIZE LIMITATIONS

Minimum Width: 48" Minimum Height: 24"
Maximum Width: 192"^[1] Maximum Height: 96"

^[1]Tracks wider than 94" are spliced to avoid oversize freight charges.

DEDUCTIONS

The ordered length of your natural drapery includes the hardware required for installation.

To accommodate the hardware, the fabric panel is made 1 1/4" shorter than the ordered length (e.g., a 96" drapery has a 94 3/4" panel).

No additional deductions are taken for outside mount.

Inside mount has the overall deductions listed below:

IB Deduction (Width): 1/4"
IB Deduction (Height): 1/2"
