THE PORTFOLIO COLLECTION
FABRIC ROMAN SHADES

THE PORTFOLIO COLLECTION

FABRIC ROMAN SHADES

The Portfolio Collection's Fabric Roman Shades offer a classic design style with modern options. You'll find a unique fabric selection with sophisticated textures and jacquards, all offered in colors selected for current design trends.

The collection's ordering and customization options were designed with your experience in mind. Choose from flat, hobbled, knife pleated, or front slat shade styles. Flat, knife pleated, and front slat shades are available to order with or without a valance.

All shade styles come standard with light-filtering liner or can be upgraded to black-out. The collection's fabrics offer seamless fabrication in all shade styles up to 96" wide by 96" long.

Bring function and safety to your shades with a variety of lift options, including cordless operation that is able to lift even the heaviest shades on a 1½" head rail or our affordable, versatile remote control motorization options, two unique ways to avoid hanging lift cords.

Enjoy peace of mind with our Limited Lifetime Warranty, covering all aspects of workmanship and quality in your shades.

BO01	Black-Out White	100% Polyester	288

SHADE STYLES

FLAT SHADE STYLE
no light coming through

FLAT SHADE STYLE
with light coming through

FLAT SHADE STYLE

Flat shades feature a flat, continuous fabric panel.

Most fabrics are available to be made in Flat style, with the exception of the fabrics noted by ^[1] on the Materials Reference table.

Liners of flat shades are seamed and include a hidden rib to provide added support. This will show a shadow on the front of light-filtering shades when light is coming through.

HOBbled SHADE STYLE

HOBbled SHADE STYLE

Hobbled shades are made with extra fabric in each fold, allowing them to keep the folded look of a roman shade even when fully lowered.

Hobbles will show between 9" and 12" on the front of the shade with 3" folds.

Hobbled shades are made without ribs and have more lift cords on the back of the shade, which provide additional support when the shade is raised. See page 10 for details.

Hobbled shades are only available in waterfall style.

NOTE: Hobbled shades may require extra dressing in the window once installed.

SHADE STYLES

KNIFE PLEATED SHADE STYLE

Ribs are sewn into pockets on the back of the shade.

There will be a seam on the front of the shade where each pocket is sewn.

Knife Pleat shades require the least amount of dressing once installed.

KNIFE PLEAT SHADE STYLE
ribs in back of shade

FRONT SLAT SHADE STYLE

Ribs are sewn into pockets on the front of the shade.

There will be a pocket on the front of the shade where each rib is inserted.

FRONT SLAT SHADE STYLE
ribs in front of shade

SHADE STYLES

WATERFALL SHADE
without valance

WATERFALL SHADE WITHOUT VALANCE

Waterfall shades come standard without a valance. Shade fabric comes off the front of the head rail.

Waterfall shades can be ordered with a front valance for a surcharge, which is used to cover the top fold of the shade.

Back valances conceal the shade components from the back of the shade and are recommended for inside mount waterfall shades. They are available for no additional charge and are made of the liner fabric.

WATERFALL FRONT VALANCE

Interior valances are recommended for light-filtering waterfall shades and are used to block the outline of the shade components from showing on the front of the shade. Interior valances install between the shade panel and the components and are made using blackout liner material. They are 3¾" long.

Waterfall shades ordered with clutch have control cords hidden behind the shade.

STANDARD SHADE
with valance

STANDARD SHADE WITH VALANCE

Standard shades have a 6" valance on the front of the head rail. Custom valance lengths may also be ordered.

The shade fabric comes off the back of the head rail.

Standard shades ordered with clutch have control cord loop adjacent to the shade.

VALANCE ONLY

Valance Only is available for all fabrics.

Valances can be specified in length up to 18" long and have a maximum width of 96".

Standard (*IB and OB shades*) and Extended (*OB shades only*) depth returns are available. Standard depth returns are made to the depth of the head rail. Extended depth returns are made slightly deeper than the head rail and help close the gap between the wall and the back of the return.

Valances will be attached to a head rail. Available head rail depths are 1½" and 2½".

Valances can be made with light-filtering liners (standard) or black-out liners (surcharge).

PANEL ALIGNMENT

TOP / BOTTOM PANEL ALIGNMENT

Top and bottom panel alignment are available.

TOP PANEL ALIGNMENT

We recommend ordering top panel aligned shades for most installations:

- Shades that are the same height in side-by-side windows.
- Shades that are differing heights in side-by-side windows where the tops of the windows align.
- Shades that are not installed side-by-side.

Top panel aligned shades will be made with the first row of rings and/or rib sewn 6" from the top of the shade.

Top panel aligned shades will have a shade apron that is between 4" and 7".

BOTTOM PANEL ALIGNMENT

We recommend ordering bottom panel aligned shades for:

- Shades that are differing heights in side-by-side windows where the bottoms of the windows align.

Bottom panel aligned shades will be made with the last row of rings and/or rib sewn at the seam of the 4" bottom hem.

Bottom panel aligned shades will have a top fold that is between 4" and 9 $\frac{1}{2}$ ". For bottom panel aligned installations where uneven top folds are a concern, we recommend ordering standard shades or waterfall shades. with a front valance.

TOP PANEL ALIGNED

BOTTOM PANEL ALIGNED

SHADE CONSTRUCTION

INSTALLATION NOTICE

Shades include pre-drilled slots in the head rail that align with a reinforced opening in the fabric. These openings are used for shade installation.

When mounting with the installation bracket, the post of the bracket goes through the slot to hold the shade in place.

If direct mounting by drilling into the mounting surface, the head rail slot should also be used by installing with the screw and washer provided to hold the shade in place.

NOTE: Drilling through the head rail outside of the designated slots can cause the fabric to snag during installation. This is not covered under the product warranty and will require an Oops Remake if a replacement is needed.

DIRECT MOUNT INSTALLATION

HEMS

Shades have a 4" double turned bottom hem and 1½" double turned side hems.

Bottom hems will include a bar that is inserted into the hem of the shade to add weight and keep the shade flat in operation.

FRONT OF SHADE
4" bottom hem and 1½" side hem

BACK OF SHADE
4" bottom hem and 1½" side hem

CORD AND RING COLOR

Lift cords, ladder tape, and shade rings are always white to match the liner on the back of the shade.

CORDING ON BACK OF SHADE

When selecting your shade style, consider the cording on the back of the shade.

Hobbled shades are made without ribs, giving them less stability. These shade styles require more cording on the back of the shade.

Flat, Knife Pleat, and Front Slat shades are made with ribs, giving them more stability. These shade styles require less cording on the back of the shade.

DESIGN OPTIONS

MULTIPLE SHADES ON ONE HEAD RAIL

Shades are available as 2-on-1 head rail.

The maximum total width is 112" and the gap between shades will be no more than ½".

2-on-1 shades are only available for standard shade styles in flat, knife pleat, and front slat panel styles.

All control types can be used for these shades.

LINERS

Shades come standard with a light-filtering liner. Black-out liners are available as a surcharge option.

Light-filtering liners are available in snow white or ivory. Black-out liner is available in white.

Liners are sewn underneath the side and bottom hems.

NOTE: Black-out liners will include black-out tape on the back of the shade to block pin holes of light from showing through. Black-out tape will be applied where the rings and ribs are sewn.

SHADE WITH LIGHT-FILTERING LINER

SHADE WITH BLACK-OUT LINER

BLACK-OUT TAPE

DESIGN OPTIONS

VALANCE RETURNS

Valance returns attach to the sides of the head rail and cover shade components and head rail from the side view.

All valance returns will be made with an L-shaped connector which attaches to the back of the valance and holds the return in place, creating a clean, finished corner.

Outside mount shades are recommended to be ordered with valance returns. Returns for both outside and inside mount shades are available free of charge if requested at the time the order is placed.

The standard size for valance returns is 4½". Returns in the standard size include a molded insert that creates the L-shape of the return. Longer returns can be ordered, but the molded insert will still measure 4½". Any additional length beyond 4 ½" will be fabric only, which may result in a softer corner finish.

Standard (*IB and OB shades*) and Extended (*OB shades only*) depth returns are available. Standard depth returns are made to the depth of the head rail. Extended depth returns are made ½" deeper than the head rail and help close the gap between the wall and the back of the return.

See chart below for return specification details or diagrams on page 20.

RETURN SPECIFICATIONS^[1]

	STANDARD SHADES	WATERFALL SHADES
Outside Mount Shades with Returns		
VALANCE	1/2" Wider than Ordered Width (1/4" wider on either side)	-
HEAD RAIL	Made to Ordered Width	1/2" Narrower than Ordered Width (1/4" on either side)

^[1] Standard shades ordered with Clutch or Pro Wand control will have control side fabric deductions, which are in addition to the deductions listed for returns.

^[2] Inside mount shades will have a ¼" overall width deduction, which is in addition to the deductions listed for returns.

STANDARD RETURN
shade fabric

CONTROL OPTIONS

CORDLESS SHADES

Standard Control.

Cordless shades operate with no lift cords on the front of the shade. They are raised and lowered by pulling on the hem bar located behind the bottom panel of the shade.

Cordless shades will be supplied with a clear hem grip that attaches to the hem bar.

A spring control system located under the wooden head rail holds the shade in place at any desired position.

HEM GRIP

CORDLESS SHADE

CONTROL OPTIONS

TOP-DOWN BOTTOM-UP

Standard shade style only; Knife Pleat panel style only.

Raised from the bottom or lowered from the top.

To conceal shade components, shades will be finished with a black-out lined front valance and a back valance. Back valance will match shade material for unlined shades or liner material for lined shades.

NOTE: Inside Mount TDBU shades are not available to be ordered with returns. For installations where returns are required for inside mount TDBU, follow the recommendation below:

Order shades as outside mount with returns. Shades should be ordered 1" narrower than the required width. This will leave a $\frac{1}{2}$ " gap on either side for the shade fabric, and the valance will be $\frac{1}{4}$ " wider on either side to create a clean corner with the returns. This will cause light gaps on the sides of the shade, and the factory will not take any additional deductions.

TOP-DOWN BOTTOM-UP SHADE

CONTROL OPTIONS

CLUTCH CONTROL SHADES

Clutches provide an assisted lift on large shades.

Clutches come standard with metal chain loops. Chains can be specified in custom lengths. If no length is specified, they will be supplied at $\frac{2}{3}$ of the shade height.

Compliant cord tensioners are provided with clutch control shades. Cord tensioners secure the cord loop to the wall or window. They must be installed for the shade to be compliant with safety regulations and to operate properly. When measuring for clutch shades find a suitable location for the cord tensioner to be installed and measure to this location.

Standard shades with valances that are ordered with a clutch come “clutch adjacent” to keep the stack of the raised shade from interfering with the loop. This means the shade fabric will be more narrow on the control side, allowing the cord to hang to the side of the shade. This may cause a light gap on black-out shades.

Waterfall shades without a valance ordered with clutch controls will have control loops behind the shade and are not available to be ordered as clutch adjacent.

WATERFALL CLUTCH SHADE
without valance

STANDARD CLUTCH ADJACENT SHADE
with valance

MOTORIZED CONTROLS

PRO WAND SHADES

Pro Wand shades are powered by a rechargeable battery motor and are operated by pressing the buttons on a wand handle, which hangs to the side of the shade.

Pro Wand is a good alternative to cordless when the window or shade size makes it hard to raise or lower the shade.

USB charging port for the motor battery is located on bottom of the wand handle.

Wand is only available in White.

4 available wand lengths: 24", 36", 48", and 60".

Motorized shades are mounted on a deeper head rail (see Specifications for details).

Shade fabric will be made narrower than the ordered width on the control side, allowing the wand to hang on the side of the shade. This may cause a light gap on black-out shades. Fabric will be $\frac{3}{4}$ " narrower on the control side for shades without returns and 1" narrower on the control side for shades with returns.

Not available to be ordered with waterfall or hobbled shade styles.

PRO WAND

MOTORIZED CONTROLS

REMOTE CONTROL SHADES

Remote motor shades are available with rechargeable and hardwired motors which can be controlled with remotes, wall switches, or motor hubs.

See available options below.

WHITE REMOTE
(15-channel)

BLACK REMOTE
(15-channel)

WALL SWITCH
(15-channel)

^[1]Requires installation by an electrician.

^[2]Battery tubes are included with shades free of charge. Battery Tube has a 5¼" attached lead wire. Requires eight Alkaline batteries (non-rechargeable), Energizer® Ultimate Lithium™ L91 Batteries, or Lithium batteries (rechargeable). Batteries are not included with battery tube.

^[3]Battery Pack has a 5¼" lead wire. Requires recharging. Ships separately from shades.

^[4]Plug-in Power Adapter has a 60" lead wire. Powers motor directly through a standard wall outlet.

^[5]When paired with the Plug-In Power Adapter, the total cable length should not exceed 16½'.

EXTERNAL LI BATTERY PACK

PLUG-IN POWER ADAPTER

PRO HUB

Connects through 2.4 GHz wifi or directly to router with ethernet cable.

Works with Connector+ App, Amazon Alexa, Control4, Google Home, IFTTT, RTI, Samsung Smart Things, and Siri Short Cuts.

PRO HUB

SHADE SPECIFICATIONS

RING SPACING

Shades ordered with top panel alignment will have the top fold start 6" from the top of the shade with rings spaced 6" apart on back of the shade. The bottom fold will start between 4" - 7" from the bottom of the shade.

Shades ordered with bottom panel alignment will have the first fold start 4" above the bottom bar with rings spaced 6" apart on back of the shade. The top fold will start between 4" - 9 $\frac{3}{8}$ " from the top of the shade.

STACK HEIGHT

Approximately (all lengths): 8" to 11"

STACK DEPTH

Approximately (all lengths): 4" to 6"

BRACKET DIMENSIONS

Height: 1 $\frac{1}{2}$ "

Depth: 1 $\frac{3}{4}$ "

HEAD RAIL DIMENSIONS

Middle support brackets will be supplied for all shades over 41" wide.

CORDLESS HEAD RAIL

CLUTCH SHADE

MOTORIZED HEAD RAIL

- Pro Wand and Remote Motorization

SHADE SPECIFICATIONS

INSIDE MOUNT SHADES

Inside mount shades have a $\frac{3}{8}$ " overall shade deduction.

When ordered with returns, the valance and shade fabric will be made to the ordered width less the inside mount deduction. The head rail will be an additional $\frac{1}{2}$ " narrower to create space for the returns to slot in and create a clean corner in the front of the shade.

Inside mount shades are made with standard depth returns, which match the depth of the head rail.

INSIDE MOUNT STANDARD SHADES

NO RETURNS:

WITH RETURNS:

INSIDE MOUNT WATERFALL SHADES

NO RETURNS:

WITH RETURNS:

OUTSIDE MOUNT SHADES

Outside mount shades have no deductions to the shade fabric.

Standard shades have a valance that is $\frac{1}{2}$ " wider than the ordered width. Waterfall shades have the head rail $\frac{1}{2}$ " narrower if ordered with returns.

Outside mount shades are available with standard depth returns or extended depth returns. Standard depth returns match the depth of the head rail. Extended depth returns are made $\frac{1}{2}$ " deeper than the head rail and help close the gap between the wall and the back of the shade.

OUTSIDE MOUNT STANDARD SHADES

NO RETURNS:

WITH RETURNS:

Standard Depth Left; Extended Depth Right

OUTSIDE MOUNT WATERFALL SHADES

WHEN SHIPPING WITH SHADE ORDER:

\$5 (per yard)

WHEN SHIPPING SEPARATELY FROM SHADE ORDER:

\$25 (for the first yard); \$5 (each additional yard)

NOTES

FABRIC ROMAN SHADE WARRANTY

LIMITED LIFETIME WARRANTY

This product is warranted against defects in materials and workmanship, provided that:

1. The product was installed according to the product instructions.
2. Manufacturer recommendations were followed regarding limitations and specifications of the product.

Manufacturer reserves the right to determine if your shade warrants a repair or partial replacement of any parts. If necessary, Manufacturer will replace your shade with a new shade of equal or superior value. This shall be your sole remedy under this warranty.

This Limited Lifetime Warranty excludes all motors, controls and accessories, which are warranted for only a period of five years from the date of purchase. Failure to follow the proper installation, charging and use instructions will invalidate the warranty for motors, remotes, wands and hubs.

This Limited Lifetime Warranty applies only to the original retail purchaser with proof of purchase in a residential application.

This Limited Lifetime Warranty does not cover the removal or installation of original or replacement shades. This Limited Lifetime Warranty does not cover damage or defects caused by, or resulting from improper maintenance, neglect or improper use, wear and tear, abuse, neglect, accidents, alteration, commercial use, installation, removal or reinstallation, or exposure to excessive moisture.

YOUR RIGHTS UNDER STATE LAW

These warranties give you specific legal rights. You may also have other rights which may vary from State to State. In no event shall Manufacturer be liable for incidental or consequential damages or for any other direct or indirect damage, loss, cost, expense or fee. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. These warranties are exclusive and in lieu of all other obligations, liabilities, disclaimers, or warranties.

THE PORTFOLIO COLLECTION FABRIC ROMAN SHADES

⚠️ WARNING ⚠️ ADVERTENCIA

ANSI/WCMA A100.1-2022

Window Blind Cord Strangulation Risk

Window blinds with a damaged or loose tension device or retractable cord that fails to fully retract pose a strangulation risk to children. To avoid this potential strangulation risk, consider purchasing cordless products with inaccessible cords.

Riesgo de Estrangulamiento en Cuerdas de Persianas

Las persianas con un dispositivo tensor suelto o dañado o con una cuerda retráctable que no se ajusta completamente representan un riesgo de estrangulación para los niños. Para evitar un posible riesgo de estrangulamiento, considere comprar productos inalámbricos o productos con cuerdas inaccesibles.
