THE PORTFOLIO COLLECTION
NATURAL SHADES

THE PORTFOLIO COLLECTION

NATURAL SHADES

Natural Shades from the Portfolio Collection add the perfect finishing touch to any room. The fabrics in this collection feature light, delicate weaves that filter sunlight beautifully for a soft, diffused glow.

Incorporating the beauty of nature in interior spaces is a timeless design trend. Natural Shades are woven by hand with materials like jute, flax, ramie, and bamboo. These materials are meticulously crafted by skilled artisans into finished shades, designed to bring the tranquility of the outdoors into your home. Finished shades display the rich textures and warm hues of their raw materials, enhancing the ambiance of any room.

Natural Shades are as functional as they are beautiful. Shades feature many customization options that allow you to design the amount of light or privacy in your space. Cordless and motorized shade controls allow modern functionality in this classic shade style.

SHADE STYLES

PATTERN SELECTION

The Materials Reference table provides useful technical information about each pattern and also identifies which price chart you should use. Coordinated edge binding colors are also listed for each pattern.

The fabrics in this collection are made from natural materials, which are subject to variation in color, texture, and weave. Like any natural product, fabrics may show natural color changes over time.

Natural fabrics are not ideal for rooms with excessive humidity like bathrooms. Shades installed in these environments may bow or twist over time.

SHADE STYLES

Standard and Waterfall styles are available. Both styles rise in folds when the shade is raised.

STANDARD SHADES

Has a 6" valance on the front of the shade.

Valances are lined with Room-Darkening liner material to conceal the head rail components. Unlined shades will have lined valances coordinated to the shade material. Light-filtering lined shades will have lined valances coordinated to the liner material.

WATERFALL SHADES

Has no front valance. The shade comes off the front of the head rail in a flat panel.

Available with back valances, which can be ordered in either the shade fabric or the liner fabric for lined shades. Back valances conceal the shade components from the back of the shade.

Available with interior valances. Interior valances come standard with waterfall shades that are unlined or that are ordered with a light-filtering liner. Interior valances block the outline of the shade components from showing on the front of the shade. Valances are 4" long and are made with coordinated liner material. *Because the valance is made with Room-Darkening fabric, the part of the shade in front of the interior valance will look darker than the rest of the shade when light is coming through.*

BOTTOM BARS

Clutch and motorized shades will be made with a flat sewn-in bottom bar. If hold down brackets are requested, a round bottom bar will be used.

Cordless shades are made with a rectangular bottom bar. The same bottom bar is used for both shades with or without hold down brackets.

STANDARD SHADE
with valance

WATERFALL SHADE
without valance

CONTROL OPTIONS

CORDLESS SHADES

Cordless shades are raised by pushing up on the hem bar and lowered by pulling down on the hem bar. A spring control system located under the wooden head rail holds the shade in place at the desired position.

Clear grips are added to the hem bar of cordless shades; one per shade up to 72" wide and two for wider shades.

Cordless shades are available up to 96" wide and 96" long and will be mounted on a 1½" deep head rail (see Specifications for details).

CLEAR GRIP

CORDLESS SHADE

TOP-DOWN BOTTOM-UP SHADES (TDBU)

Raised from the bottom or lowered from the top.

To conceal shade components, shades will be finished with a Room-Darkening lined front valance and a back valance. Back valance will match shade material for unlined shades or liner material for lined shades.

TDBU shades are not available in waterfall style, as 3-on-1 head rail, or as twin shades. Only available with cordless control.

TDBU shades can be raised and lowered by hand. A Top Bar Grip is included with all shades and ships unattached for optional installation. This grip can be paired with a Lift Assist pole to raise and lower the top bar for shades installed in taller windows.

Note: Inside Mount TDBU shades are not available to be ordered with returns. For installations where returns are required for inside mount TDBU, follow the recommendation below:

Order shades as outside mount with returns. Shades should be ordered 1" narrower than the required width. This will leave a ½" gap on either side for the shade fabric, and the valance will be ¼" wider on either side to create a clean corner with the returns. This will cause light gaps on the sides of the shade, and the factory will not take any additional deductions.

TOP BAR GRIP

TDBU

CONTROL OPTIONS

CLUTCH CONTROLS

Clutches provide an assisted lift for large or heavy shades and come standard with a nickel-plated bead chain loop.

Compliant cord tensioners are provided with clutch control shades. Cord tensioners secure the cord loop to the wall or window. They must be installed for the shade to be compliant with safety regulations and to operate properly.

Standard shades ordered with a clutch come “clutch adjacent” to keep the stack of the raised shade from interfering with the loop. This means the shade fabric will be narrower than the ordered width on the control side, allowing the cord to hang to the side of the shade (see diagram). This may cause a light gap on room-darkening shades.

Waterfall shades ordered with clutch controls will have control loops behind the shade and are not available to be ordered as clutch adjacent.

CLUTCH SHADE
with cord loop

FABRIC DEDUCTION

CONTROL OPTIONS

PRO WAND SHADES

Pro Wand shades are powered by a rechargeable battery motor and are operated by pressing the buttons on the wand handle, which hangs to the side of the shade.

Pro Wand is a good alternative to cordless when the window or shade size makes it hard to raise or lower the shade.

USB-C charging port for the motor battery is located on bottom of the Pro Wand handle.

Wand is only available in White.

4 available wand lengths: 24", 36", 48", and 60".

Motorized shades are mounted on a deeper head rail (see Specifications for details).

Shade fabric will be made narrower than the ordered width on the control side, allowing the wand to hang on the side of the shade. This may cause a light gap on Room-Darkening shades.

Not available to be ordered with waterfall shade styles or for shades with a movable liner.

PRO WAND

5/8" shade fabric deduction for shades without returns

7/8" shade fabric deduction for shades with returns

CONTROL OPTIONS

REMOTE CONTROL SHADES

Remote motors have rechargeable and hardwired options available which can be controlled with remotes, wall switches, or motor hubs.

See Specifications for minimum widths by motor type.

^[1]Requires installation by an electrician.

^[2]Battery tubes are included with shades free of charge. Battery Tube has a 5¼" attached lead wire. Requires eight Alkaline batteries (non-rechargeable), Energizer® Ultimate Lithium™ L91 Batteries, or Lithium batteries (rechargeable). Batteries are not included with battery tube.

^[3]Battery Pack has a 5¼" lead wire. Requires recharging. Ships separately from shades.

^[4]Plug-in Power Adapter has a 60" lead wire. Powers motor directly through a standard wall outlet.

^[5]When paired with the Plug-In Power Adapter, the total cable length should not exceed 16½'.

External LI Battery Pack

Plug-In Power Adapter

PRO HUB

Connects through 2.4 GHz wifi or directly to router with ethernet cable.

Works with Connector+ App, Amazon Alexa, Control4, Google Home, IFTTT, RTI, Samsung Smart Things, and Siri Short Cuts.

PRO HUB

DESIGN OPTIONS

EDGE BINDING

Edge bindings are available as a no charge option.

Edge bindings will be sewn down both sides of the shade and valance and are not applied to the bottom of either.

All edge bindings will be approximately ½" wide on the face of the shade.

Some patterns are required to be ordered with edge binding, as noted in the Materials Reference table. Patterns that require edge binding will have the warranty for frayed edges voided if ordered without it.

EDGE BINDING

EDGE SEAL

Edge Seal is used only on select fabrics when ordered without edge binding. These fabrics are noted with ^[2] in the Edge Binding Required column of the Materials Reference table.

Edge Seal is a non-adhesive tape applied to the back left and right edges of select shade fabrics. Edge Seal prevents the edges of the shade from fraying. It is also applied the valance of standard shades.

Edge Seal is transparent once applied, but it may be slightly visible from the back and front of the shade, especially if the shade is unlined. It will be more visible on darker fabrics than on lighter fabrics.

DESIGN OPTIONS

VALANCE RETURNS

Valance returns attach to the sides of the head rail and cover shade components and head rail from the side view. Returns can be made with the shade material or with edge binding material.

All valance returns will be made with an L-shaped connector which attaches to the back of the valance and holds the return in place, creating a clean, finished corner.

Outside mount shades are recommended to be ordered with valance returns. Returns for both outside and inside mount shades are available free of charge if requested at the time the order is placed.

Standard height will be 1 1/2" less than the valance height, keeping the rolled bottom of the valance from interfering with the return. Short valance returns are also available. They cover the end of the head rail and hide the shade components, keeping the stack of the raised shade away from the returns.

Standard (*IB and OB shades*) and Extended (*OB shades only*) depth returns are available. Standard depth returns are made to the depth of the head rail. Extended depth returns are made 1/2" deeper than the head rail and help close the gap between the wall and the back of the return.

See chart below for return specification details or diagrams on page 18.

RETURN SPECIFICATION^[1]

	STANDARD SHADES	WATERFALL SHADES

WATERFALL SHADE WITH RETURN
shade fabric

DESIGN OPTIONS

ATTACHED LINERS

Liners are secured with stitches on the back of the shade or sewn under the edge binding on the back of the shade.

Liners can be attached to the back of the shade, or they can be ordered as separate, operable liners (twin shades).

Patterns with an open weave let a lot of light through and offer little privacy at night. We recommend ordering shades with liners when light control or privacy are desired.

Available in Light-Filtering or Room-Darkening.

NO LINER

LIGHT-FILTERING LINER

ROOM-DARKENING LINER

TWIN SHADES

Twin shades are shades with a separate, operable liner and two sets of controls: one for the shade in front and one for the liner shade behind. Controls are recommended to be on the same side of the shade.

Controls can also be a mix of cordless, clutch, and remote motorization. Cord loops for the liner shade will always be positioned behind the front shade.

Outside mount twin shades will be made with a valance that is $\frac{1}{2}$ " wider than the ordered shade width. This will allow the returns to fit behind the valance.

Twin shades have deeper head rails to accommodate the dual sets of controls (see Specifications for details).

Twin Shades are not available as 3-on-1 head rail, or with Pro Wand.

TWIN SHADE

DESIGN OPTIONS

MULTIPLE SHADES ON ONE HEAD RAIL

Shades are available with 2-on-1 or 3-on-1 head rail. The maximum total width is 112" and the gap between shades will be no more than $\frac{1}{2}$ ". The maximum width for a common valance is 96"; wider valances will be made in sections to match the individual shade widths.

Cordless, clutches, and motorization (wand or remote) can be used for these shades. Make sure there are suitable locations for chain tensioners when specifying multiple shades on one head rail. 3-on-1 head rail is not available for top-down bottom-up shades or twin shades.

2-ON-1 SHADE

CUT OUTS

Cut outs can be taken from either side of the shade. Exact dimensions and the locations of the cut outs are required.

There may be limitations to what can be cut out, based upon the size and specifications of the shade. The factory will review all orders for cut outs, and you will be contacted if there is a production concern with the cut out request.

Not available with edge binding.

HOLD DOWN BRACKETS AND SPACER BLOCKS

Hold down brackets are supplied upon request for all control types.

Spacer blocks measuring $\frac{3}{8}$ " are available upon request with a maximum of 2 spacer blocks per bracket recommended. **Note:** if using spacer blocks with extended returns, extended returns do not account for the additional space created by the spacer blocks.

HOLD DOWN BRACKET

VALANCE ONLY

Valance Only is available for all fabrics.

Valances can be specified in length up to 18" long and have a maximum width of 96". Check the Materials Reference table for maximum fabric width by pattern.

Valance returns will be made to the ordered length of the valance or can be requested in custom lengths.

Standard (*IB and OB shades*) and Extended (*OB shades only*) depth returns are available. Standard depth returns are made to the depth of the head rail. Extended depth returns are made slightly deeper than the head rail and help close the gap between the wall and the back of the return.

Valances can be ordered attached to a head rail or loose. Available head rail depths for attached valances are: 1", 1 $\frac{1}{2}$ ", 2 $\frac{1}{2}$ ", 3 $\frac{1}{2}$ ", or 5".

Valances can be made with liners and edge binding for a surcharge. Please specify if valances should be lined or unlined and made with or without edge binding when placing your order.

^[1] Flush IB depth is head rail depth plus 1" when using standard bracket. Exact measurement will vary slightly based upon fabric thickness.

SPECIFICATIONS

BRACKET DIMENSIONS

Height: 1½"

Depth: 1¾"

RING SPACING AND STACK HEIGHT

Ring Spacing: First fold starts at 3½" above the bottom bar, then rings are spaced 7" apart on back of the shade.

Stack Height (all lengths): 8" to 10"

HEAD RAIL DIMENSIONS

Middle support brackets will be supplied for all shades over 41" wide.

CORDLESS HEAD RAIL

- Standard Shades
- Waterfall Shades
- TDBU

CLUTCH SHADE

with Continuous Chain Loop

MOTORIZED HEAD RAIL

- Pro Wand or Remote Control
- Standard Shades
- Waterfall Shades

TWIN SHADE W/ CORDLESS

TWIN SHADE W/ CLUTCHES

Controls Same Side (shown) or Opposite Sides

TWIN SHADE W/ MOTORS

Controls Same Side (shown) or Opposite Sides

SPECIFICATIONS

INSIDE MOUNT SHADES

Inside mount shades have a $\frac{3}{8}$ " overall shade deduction.

When ordered with returns, the valance and shade fabric will be made to the ordered width less the inside mount deduction. The head rail will be an additional $\frac{1}{2}$ " narrower to create space for the returns to slot in and create a clean corner in the front of the shade.

Inside mount shades are made with standard depth returns, which match the depth of the head rail.

INSIDE MOUNT STANDARD SHADES

NO RETURNS:

WITH RETURNS:

INSIDE MOUNT WATERFALL SHADES

NO RETURNS:

WITH RETURNS:

OUTSIDE MOUNT SHADES

Outside mount shades have no deductions to the shade fabric.

Standard shades have a valance that is $\frac{1}{2}$ " wider than the ordered width. Waterfall shades have the head rail $\frac{1}{2}$ " narrower if ordered with returns.

Outside mount shades are available with standard depth returns or extended depth returns. Standard depth returns match the depth of the head rail. Extended depth returns are made $\frac{1}{2}$ " deeper than the head rail and help close the gap between the wall and the back of the shade.

OUTSIDE MOUNT STANDARD SHADES

NO RETURNS:

WITH RETURNS:

Standard Depth Left; Extended Depth Right

OUTSIDE MOUNT WATERFALL SHADES

NO RETURNS:

WITH RETURNS:

Standard Depth Left; Extended Depth Right

SLIDING PANELS

SLIDING PANELS

Sliding Panels are fabricated using the Absolute Panel system by Coulisse.

Sliding panels provide a clean, contemporary look for large windows and doors. Overlapping panels are suspended from hangers, which glide smoothly on an aluminum track and pass in front or behind each other, allowing panels to stack away from the window.

Panels can be pulled open and closed with a clear acrylic wand. Panels are custom-sized, based on the ordered width and the number of panels.

OPENING OPTIONS

ONE-WAY

When open, panels stack to either the right or left. *Specify on the order to which side of the window the panels will stack.*

The standard configuration is for the back panel to be stationary and all the other panels stack in front. Reverse stacking is available, with the front panel stationary. Free-floating panels are also available.

CENTER OPENING (SPLIT DRAW)

Must be made with an even number of panels. Panels stack to both sides.

Standard configuration is the back panel on both sides to be stationary and all other panels to stack in front. 4 panel center opening can also be requested on a 2 channel track, which allows a more narrow mounting depth. See Sliding Panel Configurations on page 28.

Reverse stacking and free-floating panels are also available.

NOTE: If you want the panels to stack completely away from the window for an unobstructed view, allow for the panel width in the overall width of the shade. See Specifications for more details.

ONE-WAY LEFT STACK

CENTER OPENING (SPLIT DRAW)
shown with 2 channel track

SLIDING PANEL INSTALLATION AND CONSTRUCTION

TRACK INSTALLATION

Tracks are installed using either a top mount or face mount bracket. Both bracket options have a flange which is inserted under the lip of the track and a tab which the track snaps into to hold the sliding panel track in place.

Tracks and brackets are available in white or silver.

PANEL INSTALLATION

Panels are suspended by a Velcro top rail, which slots into the track runners. See Panel Installation on page 27 for illustration.

VELCRO TOP RAIL AND RUNNER

VELCRO TOP RAIL

BOTTOM BAR

Sliding panels will be finished with a flat, fabric wrapped bottom bar.

SLIDING PANEL BOX VALANCE

VALANCE BOARD

Sliding panels can be ordered with a valance board, which installs above the sliding panel track. 8" valances attach to the board.

Valances can be installed either direct mount if top mounting or using an L-bracket when face mounting. Sliding panel tracks will be installed to the underside of the valance board.

Valance boards will be matched to the color of the fabric used for the sliding panel.

When ordered inside mount, valances will attach to the front of the valance board only with no returns. When ordered outside mount, valances will include enough fabric to cover the front and sides of the valance to create a clean corner.

Valances will have fabric railroaded.

The height of the sliding panel is measured from the top of the valance board to the bottom of the sliding panel. The valance board is 3/4" thick, and the factory will account for all required deductions.

The depth of the valance board is based on the number of tracks the sliding panel will have. See chart below.

OUTSIDE MOUNT VALANCE BOARD
shown with return

VALANCE BOARD DEPTH

	2 CHANNEL	3 CHANNEL	4 CHANNEL	5 CHANNEL
Valance Board Depth	3"	3"	4"	4"

PANEL SIZE CALCULATIONS

Sliding panels are ordered slightly wider than required to include a 2 1/2" panel overlap allowing for privacy. Reference the table above for panel widths of select track sizes based on the configuration.

To calculate an approximate panel width, multiply the gaps between your panels (the number of panels ordered minus 1) by 2 1/2" (the panel overlap). Add this number to the overall width of your panel track. Then divide that number by the number of panels ordered.

For example: For a 96" one-way panel track, each panel will be approximately 25 7/8" wide.

4 (panels) - 1 = 3 gaps

3 x 2 1/2" = 7 1/2"

96" (ordered width) + 7 1/2" = 103 1/2"

103 1/2" / 4 (panels) = 25 7/8" approximate panel width

All panel measurements are rounded up to the next 1/8".

STANDARD PANEL CONFIGURATIONS

Width	Type of Opening	# of Panels	Track Type
48" - 84"	One-Way	3 Panels	3 Channel
	Center	4 Panels	3 Channels or 2 Channel*
84 1/4" - 120"	One-Way	4 Panels	4 Channel
	Center	4 Panels	3 Channel or 2 Channel*
120 1/4" - 144"	One-Way	5 Panels	5 Channel
	Center	6 Panels	3 Channel
144 1/4" - 192"	One-Way	5 Panels	5 Channel
	Center	8 Panels	4 Channel

*4 panel center opening can be requested on 3 channel (standard) or 2 channel track. 2 channel tracks allow a narrower mounting depth.

TRACK DIMENSIONS

TRACK DEPTHS	
2 Channel	1 1/2"
3 Channel	2"
4 Channel	2 5/8"
5 Channel	3 1/4"

The distance from the top of the track to the top of the panels is 1 7/8".

The factory will take account of this distance when calculating the panel length.

NATURAL DRAPERIES

NATURAL DRAPERIES

Natural Draperies present a sophisticated and stylish way to cover large windows or sliding doors. When specifying, note that the Natural Drapery will include decorative track with your choice of rounded or rectangular profile. Because draperies install using a decorative track, valances are not needed for this product.

Natural material is railroaded to hang vertically when ordered in this style. Draperies require edge binding, which is sewn to all four sides to protect the edges and is included in the price of the drape.

Natural draperies are constructed using wave tape. Hooks attach to carriers, which glide smoothly in a traversing track while maintaining their structure when being opened and closed.

Check the Materials Reference table for patterns that are available to be made as Natural Draperies.

OPENING OPTIONS

ONE-WAY

Drapery is one continuous panel that stacks to either the right or left. Specify on the order to which side of the window the drapery will stack.

CENTER OPENING (SPLIT DRAW)

Drapery is two panels, which open in the middle and stack to either side.

NOTE: If you want the panels to stack completely away from the window for an unobstructed view, allow for the panel stack width in the overall width of the shade. See Specifications for more details.

ONE WAY

CENTER OPENING

NATURAL DRAPERIES

INSTALLATION TRACKS

Draperies install with our contemporary decorative track, which has been specially selected to coordinate with the panels. Natural Draperies must be installed with the supplied tracks, and tracks are included in the price of the drapery.

Tracks are offered in 6 colors: Anthracite, Black, Bronze, Champagne, Silver, and White.

Tracks are offered in rectangular or round 1½" profiles and will include color coordinated end caps and brackets. Carriers and hooks will be coordinated to the track color. See image captions below for color pairings.

Track installation brackets are available for wall or ceiling mount. Wall brackets are adjustable from 3½" to 5".

Aluminum batons are color coordinated to drapery hardware and are 48 inches in length. Two batons will be provided for split draw draperies.

Tracks over 94" in width will be supplied with a splice. See photo of splice on next page.

NATURAL DRAPERIES

SIZE LIMITATIONS

Minimum Width: 48" Minimum Height: 24"
Maximum Width: 192"^[1] Maximum Height: 96"

^[1]Tracks wider than 94" are spliced to avoid oversize freight charges.

DEDUCTIONS

The ordered length of your natural drapery includes the hardware required for installation.

To accommodate the hardware, the fabric panel is made 1 ¼" shorter than the ordered length (e.g., a 96" drapery has a 94 ¾" panel).

No additional deductions are taken for outside mount.

Inside mount has the overall deductions listed below:

IB Deduction (Width): ¼"
IB Deduction (Height): ½"

SPLICED TRACK

BRACKET + TRACK

STACK DEPTH

ORDERED WIDTH	STACK DEPTH ^[1]
48"	13"
60"	16 ¼"
72"	19 ½"
84"	22 ¾"
96"	26"
108"	29 ¼"
120"	32 ½"
132"	35 ¾"
144"	39"
156"	42 ¼"
168"	45 ½"
180"	48 ¾"
192"	52"

^[1]The stack depths listed are approximate and may vary depending on the fabric type and configuration of your Natural Drapery. For split draw panels, divide the stack depth by 2.

CONTINENTAL U.S. (LONGER THAN 94") : \$100

ALASKA OR HAWAII (ALL LENGTHS) : \$150

NOTES

NOTES

NATURAL SHADE WARRANTY

LIMITED LIFETIME WARRANTY

This product is warranted against defects in materials and workmanship, provided that:

1. The product was installed according to the product instructions.
2. Manufacturer recommendations were followed regarding limitations and specifications of the product.

Manufacturer reserves the right to determine if your shade warrants a repair or partial replacement of any parts. If necessary, Manufacturer will replace your shade with a new shade of equal or superior value. This shall be your sole remedy under this warranty.

This Limited Lifetime Warranty excludes all motors, controls and accessories, which are warranted for only a period of five years from the date of purchase. Failure to follow the proper installation, charging and use instructions will invalidate the warranty for motors, remotes, wands and hubs.

This Limited Lifetime Warranty applies only to the original retail purchaser with proof of purchase in a residential application.

This Limited Lifetime Warranty does not cover the removal or installation of original or replacement shades. This Limited Lifetime Warranty does not cover damage or defects caused by, or resulting from improper maintenance, neglect or improper use, wear and tear, abuse, neglect, accidents, alteration, commercial use, installation, removal or reinstallation, or exposure to excessive moisture.

YOUR RIGHTS UNDER STATE LAW

These warranties give you specific legal rights. You may also have other rights which may vary from State to State. In no event shall Manufacturer be liable for incidental or consequential damages or for any other direct or indirect damage, loss, cost, expense or fee. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. These warranties are exclusive and in lieu of all other obligations, liabilities, disclaimers, or warranties.

⚠️ WARNING ⚠️ ADVERTENCIA

ANSIWMA A100.1-2022

Window Blind Cord Strangulation Risk

Window blinds with a damaged or loose tension device or retractable cord that fails to fully retract pose a strangulation risk to children. To avoid this potential strangulation risk, consider purchasing cordless products with inaccessible cords.

Riesgo de Estrangulamiento en Cuerdas de Persianas

Las persianas con un dispositivo tensor suelto o dañado o con una cuerda retráctable que no se ajusta completamente representan un riesgo de estrangulación para los niños. Para evitar un posible riesgo de estrangulamiento, considere comprar productos inalámbricos o productos con cuerdas inaccesibles.
